

Cambridge International General Certificate of Secondary Education - Computer Science (0478)

Cambridge
IGCSE

The International General Certificate of Secondary Education (IGCSE) is the world's most popular international qualification for 14 to 16 year olds. It develops successful students, giving them excellent preparation for their next steps in education, including progression to A and AS Level study, and equips them with skills for immediate employment. Cambridge IGCSE is recognised by universities and employers worldwide.

Cambridge IGCSE Computer Science enables learners to develop an interest in computing and to gain confidence in computational thinking and programming. They develop their understanding of the main principles of problem-solving using computers.

Curriculum Content

The curriculum content is set out in eight interrelated sections. These sections should be read as an integrated whole and not as a progression. The sections are as follows:

Section 1

Theory of Computer Science

1. Data representation
2. Data transmission
3. Hardware
4. Software
5. The internet & its uses
6. Automated and emerging technologies

Section 2

Practical Problem-solving and Programming

7. Algorithm design and problem-solving
8. Programming
9. Databases
10. Boolean logic

Futurekids studied the curriculum content and carefully divided the content into 8 different modules with the aim of facilitating the learning process of learners. The modules are as follows:

Modules	Section(s) Covered
Module 1: Fundamental Programming	7, 8
Module 2: Programming & Databases	8, 9
Module 3: Data Representation & Communication	1, 2, 3
Module 4: Computer Architecture & Software	3, 4, 10
Module 5: Internet Technologies & Security	5, 6

Scheme of Assessment

All candidates will be entered for Paper 1 and 2.

Paper 1 Theory (1 hour 45 minutes)

This paper is consisting of short-answer and structured questions based on Section 1 of the syllabus content. All questions are compulsory and candidates are required to answer them on the question paper.

Paper 2 Problem-solving and Programming (1 hour 45 minutes)

This paper is consisting of short-answer and structured questions set on Section 2 of the syllabus content. All questions are compulsory and candidates are required to answer them on the question paper. 20 of the marks in this paper are from questions based on tasks provided in the Paper 2 Problem-solving and Programming pre-release material.

Both papers will take place at FUTUREKIDS Computer Learning Center, by means of a CIE-set assessments, under controlled examination conditions. The documentation and printouts produced in the assessment will be externally marked by CIE.

Weighting of Papers

Paper	Weighting
1	50%
2	50%

Examinations Schedule

Examinations are held in June and November each year with results issued in August and February respectively.

Grading System

Grading is on an eight-point scale (A–G) and grades A to E are equivalent to O Level grades A to E.*

Recognition

IGCSE is a high profile qualification. It has exactly the same value in admitting students to institutes of further education and employment as the UK equivalent – GCSE.

- ◇ IGCSE is comparable with GCE O Level and the UK GCSE*
- ◇ IGCSE has an excellent reputation amongst international schools worldwide*
- ◇ IGCSEs are recognised as a reliable record of attainment which counts towards entry to universities and colleges around the world*
